

MANUFACTURER'S REPRESENTATIVES

APOGEE LABS

Integrate signals from diverse analog, digital and video; condition, compress and record the data and transmit it via satellite, microwave, fiber optics or common carrier systems. Serves communications, instrumentation and telemetry communities. Mux/Demux units for data acquisition and recording.

Telemetry, satellite ground systems, data communications hardware and software; Avtec delivers Systems Engineering, Data Acquisition, and Integration Services for Space and Terrestrial systems.

DAQSCRIBE
SOLUTIONS, LLC
Sensor to Browser Solutions

DaqScribe's innovative high-speed Digital Data Recorder product line along with High Performance Signal Conditioning front ends. By Integrating these key elements with a powerful software package, the resulting systems offer turnkey solutions for virtually any type of application.

DATAQ
INSTRUMENTS

PC-based data acquisition, playback, analysis hardware and software products for continuous recording, or triggered applications. Specialists in portable and desktop solutions for both industrial and medical research applications.

FREQUENCY DEVICES, INC.

Manufacturer of precision electronic components and instruments for anti-alias (low pass), high pass, band-pass, and band-reject (notch) filters along with gain amplifiers and quadrature oscillators including VME, VXI, rack-mount and bench-top instruments for data-acquisition and signal conditioning.

GRAPHTEC
GRAPHTEC AMERICA, INC.

Thermal Array Recorders and Data Acquisition Systems. Data capture and analysis with frequency response to 40MHz. Full computer compatibility via LAN, USB, RS-232, and SCSI Interfaces. Thermal Stylus Recorders. Full line of Signal Conditioners. Small, compact, low and high speed dataloggers.

G.R.A.S.
SOUND & VIBRATION

A broad range of standard measurement microphones, preamplifiers and power modules, all designed and manufactured in accordance with international standards. Array microphones, environmental & outdoor microphones, sound intensity microphones, KEMAR Manikin, artificial ears, couplers, ear & mouth simulators, pistonphones, calibration equipment, microphone and preamplifier cables and accessories.

OCEANA SENSOR
Wireless e-Diagnostics

Low-cost, high-volume sensors for OEM applications with state-of-the-art piezoceramic technology. Smart, networkable devices for wireless connection. Remote monitoring and reporting of machine health wirelessly via Bluetooth technology preventing unscheduled downtime.

OSI OHIO SEMITRONICS, INC.

OSI manufactures transducers for electrical power measurements. AC-DC Volts, Amps, Watts, Vars, Power Factor, Watthours, Signal Conditioning and Demand Metering. Full line of CE approved Din-Rail units. Test Panels and Custom Systems are available.

Power Innovations
INTERNATIONAL, INC.

A full line of quality power solutions including Uninterruptible Power Quality (UPQ) systems from 500VA to 400kVA. Power Innovations' UPQ completely isolates, filters, and regulates impure and erratic input power and produces a reliable, consistent, pure, sine wave output using high frequency power generation. Our products are used in medical, security, aerospace, networking, PC, financial, industrial, voice & data communications, & military applications.

Supplier of digital and analog magnetic tape recorder/reproducer products for scientific, commercial laboratory and government markets. High-speed digital and analog products using both rotary and longitudinal technologies, telemetry Decoms, Bit Syncs and A to D Converters to meet most Telemetry requirements. Specializing in the research, development and manufacture of high performance recording technologies for a multitude of data acquisition and storage applications.

Symmetricom's Timing, Test and Measurement division has over thirty years of experience designing and manufacturing time, frequency and synchronization solutions for our customers. We're the leading supplier of precise timing standards to industry, government, utilities, research centers, aerospace and enterprises worldwide. We provide quality customer support, backed by a strong R&D team and efficient manufacturing operations, to meet our customers' demanding needs.

Instrumentation Recorders featuring AIT tape, Flash Memory card and Digital formats. Models available with up to 64 channels with computer interface and software for digital data downloading, data monitoring, analysis, and recorder control. Computer interfaces include LAN, Firewire and SCSI. Recorders can be AC, DC or Battery powered.

Tokyo Sokki Kenkyujo Company manufactures load cells, strain gages, displacement, pressure transducers, accelerometers and related instrumentation. Data loggers, portable strain indicators, signal conditioners and fatigue data acquisition and processing systems.
